Verified all entries & found correct

Jr. Supervisor's Name, Signature & Date

Seat No. (in figures) MS2506 Centre :

Seat No. (in words) M - S - Two Five Zero Six

GOWARI ADITYA

Day & Date : August 14, 2025 Thursday Examination : 504 - Computational Lab - I Test

Subject : Computational Lab I Section :

Course/Paper No. SC-504 Medium of Answer: English

Supplement No. = Total

Write the answer book in blue or black ink/ball pen only and use of pencils in case of diagrams & sketches.

Q. No./Q. No.

Q1.

a) #include <stdio.h>

int main()

{

int n;

printf("Enter a number n:\n");

scanf("%d", &n);

if (n % 3 == 0 && n % 5 == 0)

printf("fizz Buzz Trap!");

#

else if (n % 3 == 0)

printf("Fizz");

else if (n % 5 == 0)

printf("Buzz");

No.

```
#include <stdio.h>
```

```
int n, m;
```

```
int i;
```

```
printf("Enter a number for n: \n");
```

```
scanf("%d", &n);
```

```
printf("Enter a number for m: \n");
```

```
scanf("%d", &m);
```

```
int i = n + 1;
```

```
while(
```

```
do
```

```
{
```

```
if (m % i == 0)
```

```
{
```

```
printf("%d is divisible \n", i)
```

```
break;
```

```
} // if bracket close
```

```
i++;
```

```
}
```

```
while (m % i != 0);
```

```
return 0;
```

```
}
```

The question is to find a num $> n$ that is divisible by m . This code will find numbers $> n$ that divides m .

The approach is correct.

Your algo. is RIGHT!!!

R. No./Q. No.

Q1.

c) #include <stdio.h>

int main()

{

int n, marks;

printf("Enter the number of students")

scanf("%d", &n);

for (int i = 0; i < n; i++)

{

printf("Enter marks for ~~the~~ student %d", i);

scanf("%d", &marks);

if (marks >= 0 && marks <= 100)

{

if (marks >= 90)

printf("Grade A");

continue;

else if (marks >= 75 && marks < 90)

{ printf("Grade B");

continue;

}

else if (marks >= 60 && marks < 75)

{ printf("Grade C");

continue;

}

Q. No.

2)

```
else if (marks  $\geq$  40 && marks < 60)
```

```
{
```

```
    printf("Grade D");
```

```
    continue;
```

```
}
```

```
else
```

```
{
```

```
    printf("Fail");
```

```
}
```

```
} // if bracket close
```

```
else
```

```
{
```

```
    printf("Invalid Input, marks between  
0 and 100");
```

```
} // else close
```

```
} // for loop close
```

```
return 0;
```

```
}
```

H. No./Q. No.

Q2

d) #include <stdio.h>

int main()

{

int n;

int current_number = 1, i, j;

int sum = 0;

printf("Enter a value for n: ");

scanf("%d", &n);

i = 1;

while (i <= n)

{

sum = 0;

for (j = 1; j <= n; j++)

{

sum = i + j;

if (sum % 2 == 0)

{

printf("%d", current_number);

current_number++;

}

else

printf("-");

} // for loop end;

i++;

printf("\n");

}

7

```
#include <stdio.h>
```

```
int main()
```

```
{
```

```
    int n;
```

```
    printf("Enter a number n: \n");
```

```
    scanf("%d", &n);
```

```
    if (n % 3 == 0 || n % 5 == 0)
```

```
    {
```

```
        if (n % 3 == 0 && n % 5 == 0)
```

```
            printf("Fizz Buzz Trap!");
```

```
        else if (n % 3 == 0)
```

```
            printf("Fizz");
```

```
        else if (n % 5 == 0)
```

```
            printf("Buzz");
```

```
        else if (n % 1 == 0)
```

```
            printf("Safe");
```

```
    } // if bracket
```

```
    else
```

```
    {
```

```
        printf("Safe");
```

```
    } // else close bracket
```

```
    return 0;
```

```
} // main close bracket
```
